## ESCAPE ROOM WORKSHOPS

### ESCAPE ROOM 1: AZTEC GOLD

Your trip to find long lost Aztec gold has managed to get you stuck in a cave with only one means of escape. Apparently, the creator of this cave was a master puzzler and to get out with the loot you need to show some understanding of levers, water flow and ciphers. Can you escape to fame and fortune before the cave network is flooded out?

### ESCAPE ROOM 2: LOST SCIENCE TEACHER

What on earth has happened to your science teacher? Mr Lewis didn't show up to class and his office seems to be trashed with documents marked 'TOP SECRET' all over the floor. You start to ponder if he is some sort of a secret agent until the door automatically locks and his office begins a self-destruct sequence. You need to work together to solve puzzles involving gears, circuits and deductive reasoning before it all goes KABOOM!

### ESCAPE ROOM 3: UNDERCOVER FIELD AGENT

A sharply dressed top secret agent has just dropped off a package which is meant to test if you have the skills to become undercover field agent. Can you manage to decipher a multimeter and put it to use in some circuits before your hopes of joining the ranks of the secret service are dashed forever?
